The Royal Aeronautical Society Hamburg Branch invites to a Lecture

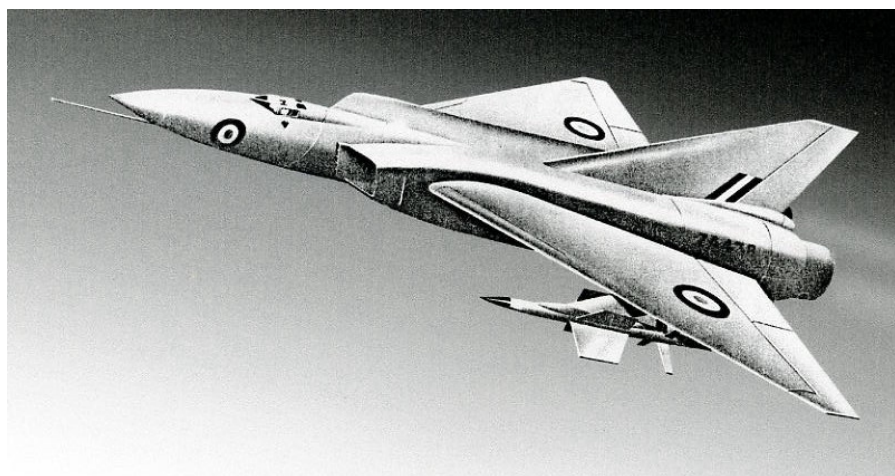

British Fighter Projects since 1945

Tony Buttler MA, AMRAeS
Aviation Historian & Author

The lecture will describe the development of British fighter aircraft from the first post-war generation (Hunter, Javelin, Sea Vixen, etc) to Eurofighter, but concentrating on the many unbuilt projects that fell by the wayside. Most British fighters were the result of competitions involving designs submitted by the numerous individual companies. There were other competitions, like the mid-1950s heavy interceptor, which did not result in any hardware but still produced several design studies

The lecturer worked as a metallurgist in the aircraft industry for 20 years with High Duty Alloys. He then did a Masters degree with the objective of becoming an archivist, but eventually his interests in military aircraft led to the start of a career as an aviation historian, which has now lasted for 12 years.

He has published many books including ones on British, American and Soviet military aircraft.

When: Tuesday, 23rd October 2007, 19:00 h
Where: Hochschule für Angewandte Wissenschaften (HAW), Berliner Tor 5
(Neubau), Hörsaal 01.12, 20099 Hamburg
