

RAeS Hamburg in cooperation with the DGLR, VDI, ZAL & HAW invites you to a lecture

“Cybersecurity in Aviation”

Jean-Paul Moreaux, Principal Coordinator, Cybersecurity in Aviation, EASA

Date: Monday 11 September 2023, 18:30

(light refreshments available from 18.00 and there will be a get-together with refreshments after the lecture)

Location: ZAL TechCenter, Hein-Sass-Weg 22, 21129 Hamburg and on Zoom

(If you wish to attend, please [register online](#) or send a mail to [Susanne Altstaedt](mailto:Susanne.Altstaedt@gmX.de), susanne.altstaedt@gmx.de)

For a long time, aviation did not give information security a high priority – until industry started to use commercial technology on board its aircraft. That was the turning point for starting the catch-up sprint. Ever since then a lot has been achieved, while cyber-attacks are increasing in frequency and intensity. So far, safety has not yet been compromised, but a few “near misses” have already occurred. So we need to stay alert, agile and diligent to get in front of the power curve, so future attacks will face a resilient aviation, which can be attacked but not brought to its knees.

Jean-Paul has been involved in Cybersecurity since the mid 90s and joined EASA in November 2015, after more than 27 years – about 15 of which in a similar capacity – at Airbus. As early as 2011 he initiated one of the first requests to ICAO by Eurocae to address Cybersecurity. Today he is involved in related ICAO activities, chairing the Trust Framework Panel and participating in the Cybersecurity Panel.

DGLR / HAW Prof. Dr.-Ing. Dieter Scholz
